

# CORDELIA 4PK - Corneal laceration repair

PRODUCT NUMBER: 1683

## DESCRIPTION:

The **CORDELIA** Model, in addition to being used for **excision and in-situ recovery**, can be used for **corneal laceration repair**, as seen in trauma scenarios.

Just create your own trauma, from a simple clean laceration on the central cornea, to more complex jagged lacerations involving cornea and limbus. Practice your suturing skills using CORDELIA, a great complement to any ophthalmic simulation program.

## SKILLS:

- Corneal lacerations
- Trauma surgery
- Suturing techniques

### MORE THAN SIMULATORS S.L.

Calle de la Hoya, 4 2º  
44570 Calanda (Teruel)  
Spain

- Gain manual dexterity

## CHARACTERISTICS:

- The CORDELIA Recovery simulator is based on an in-situ excision scenario. Eye bank technicians must master this technique to successfully recover delicate corneal tissue from donors in the field.
- CORDELIA is a task trainer that allows students to learn and practice the tissue recovery technique minimizing the use of valuable donor tissue, in a realistic yet simple manner.
- Its repeatability and availability makes it ideal for developing standardized methods of instruction and assessment.

## INCLUDE:

- 4 Corneal laceration eye simulator
- 1 Storage box
