- Oral and nasal intubation
- Laryngeal Mask Airway (LMA) and supraglottic device insertion
- Combitube insertion
- Double lumen endotracheal tube insertion
- Diagnostic bronchoscopy
- Lung isolation techniques using left and right endobronchial tubes and bronchial blockers
- Lung suctioning techniques

CHARACTERISTICS:

- AirSim airway is certified to practice 20,000+ intubation cycles without fail
- Anatomically correct nasal cavity, which allows for important landmarks such as the turbinates to be clearly defined; Features bronchi which provides internal anatomically correct features down to the fourth generation
- Inflatable tongue bulb to create tongue edema providing a variance during training
- Novel neck construction which can be secured into various positions
- User feedback through the visualization of stomach inflation and lung expansion
- Two difficult airway options are available (if required)
- Delivered ready to use in a durable carry case for easy transportation and safe storage

INCLUDE:

- 1 AirSim Bronchi (assembled and ready to use)
- 1 TruCorp carry case
- 1 USB pen drive containing product user manual
- 1 bottle of TruCorp lubrication (100ml)
