

PAT PRESSURE ULCER

PRODUCT NUMBER: 1455

DESCRIPTION:

'Pat' Pressure Injury Staging Model™ is an effective tool to educate all healthcare providers, patients, families and caregivers in the identification and staging of pressure injuries.

This model is also an excellent visual aid for educating those who cannot read well enough to understand basic health care information, allowing them to see what can occur without proper care.

SKILLS:

This comprehensive model displays the following pressure injuries: Stage 1, Stage 2, Stage 3 with undermining, tunneling and slough, a shallow Stage 4 over the malleolus with exposed bone and tendon, and an unstageable eschar/slough wound.

Allows for med

CHARACTERISTICS:

- Three separate fistulas are present in the abdominal wound area:
- Stomatized Fistula – Easy to observe effluent flow
- Non-Stomatized Fistula – Difficult to observe when effluent is not flowing
- Hidden Fistula – Location is not observed

Any combination of the three fistulas can permit effluent flow via color-coded pinch clamps, allowing for a challenging scenario when applying a dressing.

INCLUDE:

- 1 PAT simulator
- 1 Carrying bag (option)
