

PEDIATRIC INJECTION LEG - 1 YEAR

PRODUCT NUMBER: 1169

DESCRIPTION:

The Mike® and Michelle® Intraosseous leg simulates that of an average 1 year-old child. The leg is attached to a half section of a lower torso. A replaceable tibial bone lies under a smooth outer skin, and is molded with anatomic landmarks for teaching intraosseous access and infusion. A femoral vein/ artery pair and an intramuscular injection site are included.

SKILLS:

- Intraosseous access
- Infusion of medicaments/fluid exercises
- Blood draw exercises
- Intramuscular injection
- IV training exercises

CHARACTERISTICS:

FEATURES:

- Realistic "pop" as needle penetrates cortex and enters bone marrow
