

Simulator for jugular venous access and ultrasound-guided nerve blocks

PRODUCT NUMBER: 4188

DESCRIPTION:

Simulator for jugular venous access and ultrasound-guided nerve block facilitates the acquisition of knowledge and skills for performing jugular venous access and ultrasound/ultrasound-guided interscalene and supraclavicular nerve blocks. It allows the practice of injections and teaches recognition of the anatomy of the brachial plexus by ultrasound and needle-eye coordination to guide safe needle insertion.

SKILLS:

VENOUS and ARTERIAL ACCESS GUIDED BY ECOGRAPHY:

- Carotid artery
- Internal jugular vein

- Subclavian artery

ULTRASOUND-GUIDED NERVE BLOCK:

- Interscalene
- Supraclavicular
- Deep cervical
- Stellate ganglion

CHARACTERISTICS:

GENERAL:

- The fabric of the simulators is self-repairing and durable.
- Fabric is suitable for use with any ultrasound/ultrasound equipment.
- The vessels depicted are solid, requiring no liquid filling for use. This eliminates liquid leakage, providing a more aseptic learning environment.
- Easy cleaning and storage, simply remove the ultrasound gel completely and remove moisture from the tissue.
- The simulator incorporates a rigid tray for fluid collection.

ANATOMY DEPICTED:

- Anterior scalene muscle; middle scalene muscle; sternocleidomastoid muscle; carotid artery; internal jugular vein; subclavian artery; clavicle; C2-C7; first rib; clavicle; clavicle; brachial plexus; Longicolli; stellate ganglion.
- Sternocleidomastoid muscle; Clavicle; Lateral neck; Thoracic wall; Thyroid notch; Sternocleidomastoid muscle; Clavicle; Lateral neck; Thoracic wall; Thyroid notch.

INCLUDE:

- Nerve block simulator
- 1 jugular insert (pre-installed)
- Rigid fluid collection and support base
- Dust bag
- Carrying case
