

Wrist Sleeve with Open Fracture - Integrated Bleeding

PRODUCT NUMBER: 2461

DESCRIPTION:

Enhance the realism of your scenarios with ultra-realistic simulated sleeves; they aid in patient characterisation and the creation of enhanced simulated scenarios.

Place the sleeve directly on a manikin or standardised patient to practice proper diagnostic techniques, cleaning, bleeding control and wound dressing.

This sleeve has a fabric strap and Velcro, and can be placed on:

- Forearm

CHARACTERISTICS:

GENERAL:

- Designed and made with the same materials, manufacturing techniques and quality used in leading films, these wounds are extremely detailed, including tissue density, subtle skin textures, colour, tissue degradation and fine hair.
- Our sleeves are made of high quality silicone, fast and practical, and very realistic.
