

# FACIAL INJECTION SIMULATOR - ADULT MODEL C

PRODUCT NUMBER: 3181

## DESCRIPTION:

Our facial injection simulator is made of a high quality platinum-hardened silicone prosthesis with a realistic tactile feel. The skins are then mounted on a rigid foam skull that has several reference points to aid in the teaching process.

These skulls are attached to 2 flexible supports that allow the head to be tilted into suitable positions. Each head is then hand painted, attached to a plastic backing and mounted on a high quality base.

## SKILLS:

- Botox injection (botulinum toxin)
- Superficial filler techniques

## CHARACTERISTICS:

### GENERAL:

- Made from ultra-realistic high quality silicone.
- Expertly sculpted and moulded
- Hand painted down to the smallest detail

### INSTRUCTIONS FOR USE:

- Allows fluid injection: After administration, dry the treated area with a tissue and/or paper. Pinch the area to remove the fluid from the inside through the same hole where the injection was made.
- Check that the fluid has been completely removed to avoid deformation of the appearance of the simulator.

## INCLUDE:

- 1 Modelo de inyecciones faciales
- 1 Soporte

## ADDITIONAL MODULES:
