

SUPER OB SUSIE - Ultra-realistic childbirth simulator

PRODUCT NUMBER: 1141

DESCRIPTION:

The new **SUPER OB SUSIE** is a **realistic childbirth torso** designed to aid educators **teaching labor and delivery management skills to learners of all levels**. The anatomically accurate structures allow learners to develop clinical skills transferable to scenario-based training. The modular design allows the functionality to expand with growing specific training needs.

To further extend use, additional modules of Post-partum hemorrhage and episiotomy repair are available.

SKILLS:

- Execute cephalic deliveries

- Perform Ritgen's maneuver
- Practice breech deliveries (complete, frank, and footling)
- Perform Pinard's maneuver
- Simulate shoulder dystocia
- Practice emergency interventions: McRobert's maneuver, suprapubic pressure, posterior arm sweep and Wood's Screw
- Perform placental and umbilical exercises: placental delivery, partial placenta previa, nuchal cord, cord prolapse, true knot, and many others
- Practice Umbilical cord procedures like clamping and cutting
- Demonstrate internal rotation, expulsion, and external rotation
- Perform operative deliveries with real instruments like vacuum suction delivery and forceps assisted delivery
- Simulate nasal and oral suctioning
- Rectal suppository administration.

CHARACTERISTICS:

GENERAL:

- Adult-sized lower torso from diaphragm to quadriceps
- Smooth skin with seamless joints for enhanced realism
- Anatomically accurate pelvic landmarks including ischial spines and coccyx
- Supports bench top training or hybrid simulation
- Removable pregnant abdominal cover
- Articulating hip joints aid in performing McRobert's maneuver
- Removable cervix and birth canal
- Lifelike placenta with removable cotyledons
- Practice catheterization exercises with patent urethra
- Urine reservoir holds up to 400m
- Patent rectum accepts suppositories

BIRTHING BABY:

- Full-term neonate has palpable landmarks, articulating limbs, and soft full-body skin
- Seamless, articulated joints
- Nasal and oral cavities
- Palpable fontanelle and sutures
- Smooth, seamless scalp
- Realistically articulating neck and torso
- Detachable umbilical cord and cord stumps for additional cutting and clamping
