

Simulador para auscultación pulmonar y cardíaca en adultos

Nº DE PRODUCTO: 1221

DESCRIPCION:

The HAL is a manikin designed to help **teach site-specific heart and lung auscultation skills** using seamless simulation technology. Simply press the bell against the skin and listen.

The students use realistic and palpable anatomic landmarks on the manikin to locate the site where a specific sound should be heard. If correct, they will hear the appropriate sound through the stethoscope and/or external speakers.

HABILIDADES:

- Cardiac auscultation assessment
- Pulmonary auscultation assessment
- Stethoscope use

CASOS Y PATOLOGIAS:

- Pleural friction
- Pulmonary Edema
- S3
- Starr-Edwards Valve

CARACTERISTICAS:

GENERAL:

- Adult size mannikin
- Hear the appropriate heart or lung sound as bell of stethoscope is moved across the front and back of the torso
- Full size adult torso with palpable anatomic landmarks
- Sensor network hidden beneath the skin
- Includes our Virtual Stethoscope® with multiple heart and lung sounds
- An external speaker can plug into the Virtual Stethoscope so a classroom can hear what the student hears (speaker not included)

INCLUYE:

- 1 HAL Skills trainer
- 1 Virtual stethoscope
- 1 Carrying bag
- 1 Instructions manual
