

SIMULADOR PARA INTUBACIÓN CANINA

Nº DE PRODUCTO: 1950

DESCRIPCION:

Elegantemente simple: este modelo está diseñado para realizar una colocación endotraqueal adecuada. El tubo ET ingresa correctamente en la tráquea o incorrectamente en el esófago.

HABILIDADES:

- Endotracheal tube placement
- Ventilation exercises

CARACTERISTICAS:

- Elegantly simple – this model is built for performing proper endotracheal placement. The ET tube either goes correctly into the trachea or wrongly into the esophagus.
- Improved representations of the trachea, esophagus and epiglottis are all realistically crafted into this dog bust. It also features an airway with working lungs.
- Because the head is attached to a table clamp with a pivot base, it can be easily manipulated.
