- Cuadros simulados para mejorar las habilidades de otoscopia neumática de los estudiantes; solo disponible con la compra de *add-on* PneumatoSim™

CARACTERÍSTICAS:

- Verify student progress via the instrumented otoscope.
- Trainees can point with this device to complete the learning feedback loop.
- Expand student knowledge through reviewing over 400 high-resolution images from the Hawke Library to instruct, practice, and test students
- Save instructor time by connecting up to 14 OtoSim™ units to a single trainer laptop to effectively instruct groups at the same time
- Supplement classroom instruction with 150 pre-annotated images for self-directed learning
- Improve viewer retention through immersive full-screen experience with a simple, easy-to-use graphical user interface
- Increase student capability through advanced quizzes with randomized, realistic clinical scenarios that test both medical and patient interaction skills
- Build student confidence through the use of the instrumented otoscope, allowing students to practice and improve their otoscopic technique

INCLUYE:

- 1 unidad base Otosim 2
- 1 oído derecho
- 1 auricular izquierdo
